

Project Design Phase-II

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Users Authorization levels	Complete mapping are given in a hierarchical manner in order to show only the specific Data.
FR-2	Historical Data	The Data are stored in the cloud from the beginning Stage till the Updation .
FR-3	User Authentication	The credentials is accessible only to the authorized users to access the model.
FR-4	Users rules and laws	There is some specific guidelines which has to be followed by the users.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Final data should be easily understandable.
NFR-2	Security	The model are designed in a secured manner in order to maintain the privacy
NFR-3	Reliability	Even if there is a firmware issues (failures) the last updated Data's are stored in a Default manner.
NFR-4	Performance	High quality sensors are used to ease the customer's work.
NFR-5	Availability	The model are designed in such a way that are available ,usable and can be modified anytime.
NFR-6	Scalability	The System are Scaled according to the size of the water body (varies)
